

Eco-Update!

Welcome to the first ever Eco-Update! This is a way for us to share news with the school and to try and make the school a more eco-friendly place.

So far this year, we have had three meetings and have taken part in the Christmas Market.

We sold plants at the Christmas Market to start our fundraising journey for a new school pond!

Thank you so much to everyone that bought a plant— with your help we managed to raise over £150!

Later on in the year, we are hoping to attend the Summer Fayre 2026 where we will be selling more plants but also eco-friendly keyrings, bracelets and decorations.

Any donations of thread, wool, shells, wooden beads or plants will be gratefully received!

Tips on how to be more eco-friendly at home!

- Remember to turn off the lights when you leave the room.
- Try and recycle as much as you can.
- Reduce your use of plastic.
- Turn off your taps when you're not using water.
- Sort your rubbish properly!

From, The Eco-Team
